

Service Bulletin SB-2

"Asset Check Failed" Message

Some experience downloading and formatting a USB drive is required. Make sure your game is powered off before removing and formatting your USB Drive.

Symptom: Cannot Play a 2.0 Game and have an "Asset Check Failed" Message on the Game Display.

This is caused by the game checking for correct 2.0 audio and video files. Make sure that valid files are found on the USB storage Device. Causes range from a bad SD or USB storage device to missing or zipped files when downloaded.

Solution: Download the latest code from <https://www.pinballremakes.com/downloads/>

Update the game with the downloaded software code. If you need help updating the software, consult the software update instructions at:

https://www.pinballremakes.com/wp-content/uploads/2022/03/FH2_Game_Update.pdf

If the problem does not go away after a format and reinstall of the software you should contact your distributor for assistance
